ABOUT ME

Fullstack Developer specialized in integrating AI solutions into web applications and streamlining workflows through automation tools. Experienced in containerization and orchestration using Docker and Kubernetes, with a strong adherence to version control best practices via Git and GitHub.

EDUCATION

Hanoi University of Civil Engineering | 2021-2025

Senior Accountant

- GPA: 3.2/4
- Honors: Scholarship for Excellent Academic Performance (awarded in all semesters from the 3rd year onwards for major subjects).
- Actively participated in academic activities at the university

WORK EXPERIENCE

Viettel Solutions | Jan 2024 – July 2024

Business Analyst

- Participated in the analysis and design of the Ministry of National Defence's Public Service system (Phase 2) to improve operational efficiency.
- Gathered requirements from relevant units to ensure the system met practical needs.
- Modeled business processes and analyzed administrative procedures to optimize workflows.

Arcanic AI | Jan 2025 – Present

AI Engineer, Fullstack Developer

- Participated in AI and Gen AI projects; integrated AI features into websites.
- Key Projects:
 - AI Orate: Applied AI to E-learning for Viva-style interviews and Socratic-style questioning practice.
 - Arcanic Platform: Applied AI for text processing (summarization, Q&A), implemented RAG architecture for multi-document search, and integrated Workflow Automation based in N8N to optimize processes.

SKILLS

- | | | |
|------------|--------------------|---------------------------|
| • Gen AI | • Node.js | • Prompt Engineering |
| • React.js | • Automation Tools | • Artificial Intelligence |

PERSONAL PROJECTS

E-LEARNING

Automatic Lesson Plan Generation System

- Developed a system to automatically draft lesson plans based on user-provided documents.
- Structured materials into lectures containing content, exercises, and tests.
- Integrated AI technology to assess student comprehension levels, optimizing and adjusting lesson plans effectively.

MULTI-MODAL

Automated Diary from Multimedia

- Developed a system to process multimedia documents (text, image, audio) to support journaling and daily task management.
- Designed automated processes to analyze and synthesize information from diverse document formats to enhance data storage and retrieval efficiency.

CRM

Website Builder with Chatbot Integration

- Built websites with integrated Chatbots trained on provided documents to enhance user experience.
- Developed and deployed CRM functions and multi-platform automated posting systems.
- Combined and optimized automation workflows, including Chatbots on social networks like Telegram and Facebook.
- Implemented automated processes for sending emails to diverse user groups via the CRM system.

ACHIEVEMENTS & CERTIFICATIONS

- TOEIC 765
- TOP 20 - IoT Challenger – FPT Software.
